CS 442 Meeting Minutes

Group: <u>07</u>　　　Date: <u>February 23rd, 2019</u>　　Time: ~<u>19:00</u>　　　Duration: ~<u>1.5 hr</u>

Present, on time: Ben Maciorowski, Stephen Walden, Tian Zhou, Linda Zhou
Present, not on time:
Absent:

Synopsis: Catch-up redirection of taskings as previously given and check-ins - Installation of Flask/Production run on hosting server.

Recent Accomplishments:

Ben
- Pair programming with Stephen during production server setup.

Stephen
- DevOps Completely cancelled - Due to resource/time-management
- Installed and ran application successfully on desktop - manual continuous integration (is that even a thing?)

Linda
- Learned the behind the scenes of Flask minimal application setup as Stephen drives

Tian
-

All
- **Review of code and styling sheets, add select files to .gitignore**

Current Activities:

Ben
- Continue working on Jenkins and Docker with Stephen
- Create more forms in python
- Will do some styling

Stephen
- Get Deployment Pipeline operational - Cancelled.
- Finally work on Database API
- Lowercase all DB schema

Linda
- Correct any remnant un-Flask-ified html code
- Continue to work on project card display on dashboard

Tian
- Work in conjunction with Linda on front-end

Action Items:
- Work on front-end pages especially the dashboard page
- Make sure DB is hooked up to each front end UI component
- Get Jenkins to successfully install
- Style the front-end pages
